

Dragi colegi,

Avem placerea de a va prezenta noile functionalitati aduse de versiunea **IRIS.plus 10.0**.

Cuprins

I) Fereastra pop-up de servicii suplimentare

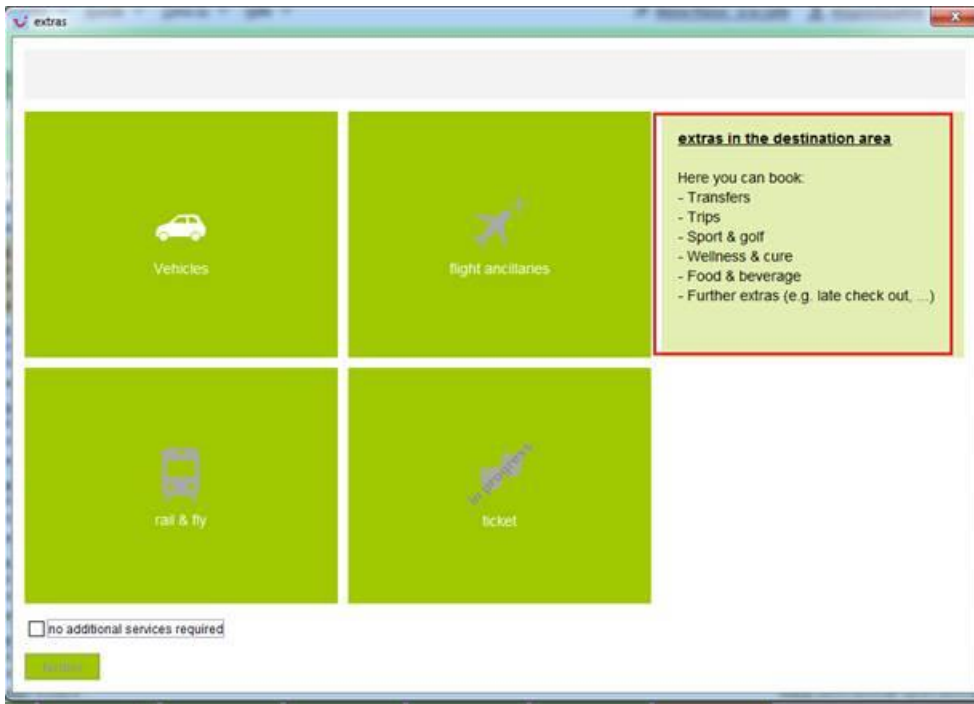

II) Holiday matcher 2.0 (Urlaubsmatcher 2.0)

holiday matcher 2.0

I) Fereastra pop-up de servicii suplimentare "Extras" ("Zusatzleistungen") – un NOU format

Fereastra pentru serviciile aditionale a fost redesenata. In continutul noii ferestre au fost integrate si serviciile de rent-a-car si serviciile aditionale pentru componenta de zbor.

Serviciile aditionale sunt afisate ca in pagina principala de IRIS.plus – in module. In functie de produsul principal care se doreste a fi rezervat, respectiv ce servicii aditionale se pot combina cu produsul principal, modulele din fereastra de Extras sunt active sau inactive. Cu mouse over pe fiecare modul se poate observa un rezumat al serviciilor din acea categorie.

1. Modulul "Vehicles" - "Mietwagen" ("Rent-a-car")

Dupa selectarea acestui modul, vom fi transferati in pagina de Rent-a-car, unde data de check-in se preia automat ca data de preluare a masinii. Cu toate acestea, toate input-urile din aceasta fereastra sunt editabile si se pot ajusta in functie de criteriile punctuale ale solicitarii.

Fereastra **“Extras” (“Zusatzleistungen”)** va ramane deschisa, avand posibilitatea de a selecta si alte servicii aditionale din meniurile superioare. Cu click pe butonul **close (beenden)** vom inchide aceasta fereastra.

Aceste servicii aditionale sunt clasificate pe mai multe categorii, reprezentate prin simboluri specifice. Pentru fiecare categorie de servicii suplimentare sunt afisate maxim trei optiuni, in sa cu click pe link-ul "**x further offers available**" ("**x weitere Angebote vorhanden**") vor fi vizibile si celelalte servicii din categoria respectiva.

Serviciile sunt ordonate pe linii si coloane si avem posibilitatea de a le selecta per sens (dus, retur) si per persoana, prin bifarea casutelor corespunzatoare. Accesam butonul **Product info** pentru verificarea descrierii produsului.

3. Modulul "extras in the destination area" ("Extras im Zielgebiet")

Serviciile aditionale sunt grupate si aici pe categorii, cu simboluri specifice. Pentru fiecare categorie de servicii suplimentare sunt afisate maxim trei optiuni, insa cu click pe link-ul "**x further offers available**" ("**x weitere Angebote vorhanden**") vor fi vizibile si celelalte servicii din categoria respectiva.

In cazul unui transfer ca serviciu aditional, cu click pe link-ul care include data sau pe simbolul  din dreptul acesteia, vom alege ziua pentru care dorim efectuarea transferului respectiv. Iar cu click pe link-ul *Transfer information mandatory (Transferinfoeingabe erforderlich)* sau pe simbolul  din dreptul acesteia, se va deschide o mica fereastra pop-up in care vom completa datele necesare pentru organizarea transferului la destinatie: detaliile de zbor si, daca formatul il cere, si numele hotelului. Cu click pe butonul **apply (übernehmen)** vor fi preluate aceste date.

Cu click pe butonul **add (hinzufügen)** vom transmite produsul selectat in Shopping Cart.

!!! Va rugam sa parcurgeti cu atentie descrierea fiecarui serviciu suplimentar cu ajutorul butonului **Product info**, pentru a identifica particularitatile ofertei si care dintre transferuri se combina concret cu serviciul principal.

Fereastra **"Extras" ("Zusatzleistungen")** va ramane deschisa, avand posibilitatea de a selecta si alte servicii aditionale din meniurile superioare. Cu click pe butonul **close (beenden)** vom inchide aceasta fereastra.

4. Servicii aditionale in Shopping Cart

In Shopping Cart, in continuare avem posibilitatea de a elimina un serviciu aditional, utilizand simbolul . Prin accesarea butonului **extras (Zusatzleistung)** putem redeschide fereastra pop-up pentru adaugarea unor alte servicii aditionale inainte de inchiderea rezervarii.

II) Holiday matcher (Urlaubsmatcher) 2.0

Modulul *Accommodation (Unterkunft)* a fost actualizat astfel incat in momentul accesarii primul tab care este activ este *holiday matcher (Urlaubsmatcher)*. Meniul *Accommodation (Unterkunft)*, in care suntem obisnuiti sa lucram, este setat acum pe al doilea tab in acest modul. Oricand putem accesa un tab sau altul, cu un simplu click.

Acest nou instrument de lucru ne ajuta, dupa cum ii spune si numele, sa match-uim usor cerintele turistilor cu rezultatele cautarii. Ne ajuta in identificarea eficienta a ofertelor care corespund preferintelor turistilor, cu flexibilitate ultra-confortabila pe intervalul de calatorie, durata sejurului, destinatii multiple.

Super-gadget, nu-i asa? ☺

Criterii de cautare

The screenshot shows the TUI Holiday matcher 2.0 interface. The top navigation bar includes tabs for back, forward, main page, package, flights, accommodation, cottages, round trip, river cruise, extras, tickets, vehicles, insurance, boating holiday, res. list, info, print, and combi booking. The 'holiday matcher 2.0' tab is active. Below the navigation bar, there are three sub-tabs: 'holiday matcher 2.0', 'accommodation', and 'pre-booking'. The main search area is divided into several sections:

- travel dates (please fill in first):** Includes fields for earliest start date (15.09.2015), latest end date (15.10.2015), and duration (7-9 nights). A red box labeled '1' highlights the duration field.
- Reiseziele (3LC, Ort, Region, Land, Hotel):** Includes a text input field with the value 'VRA X Bang Tao Beach X Antalya X Griechenland X'. A red box labeled '2' highlights this field.
- occupancy age:** Includes a dropdown menu with the value '02'. A red box labeled '3' highlights this field.
- room type:** Includes a dropdown menu with the value 'any'. A red box labeled '4' highlights this field.
- maximum total price:** Includes a text input field. A red box labeled '5' highlights this field.
- features:** Includes a text input field with the value 'Partypeople X'. A red box labeled '6' highlights this field.

On the right side of the interface, there is a sidebar with filters for operator/provider, TUI Reisewelten, category, hotel brand/concept, and board. A red box labeled '14' highlights the 'hits' count in the sidebar.

At the bottom of the interface, there are two buttons: 'Vakanz' and 'Zurücksetzen'.

Avem posibilitatea de a efectua cautarea utilizand urmatoarele criterii:

- [1] intervalul si durata calatoriei
- [2] cod de 3 litere, statiune, regiune, tara, hotel (unul, mai multe sau toate aceste criterii)
- [3] tariful maxim total
- [4] tipul camerei, care permite selectii multiple
- [5] touroperator, TUI Travel Worlds, categorie de stele, TUI Brand Hotels, tip de masa – toate permit selectii multiple
- [6] un anumit text (cuvant-cheie) pentru caracteristici / facilitati

Holiday matcher recunoaste peste 8.000 atribute din **Content.plus** IRIS.plus, dupa care identifica hotelurile. Caracteristicile care sunt cel mai frecvent solicitate de catre turisti pot fi selectate cu un simplu click din sectiunea **features (Merkmale)**.

Cu click pe butonul **Vakanz** vom efectua cautarea si vom merge in pagina urmatoare pentru vizualizarea rezultatelor, iar butonul **Zurücksetzen** are functia de eliberare a mastii (CLEAR).

Sistemul va afisa numarul de rezultate care indeplinesc toate caracteristicile din pagina de input.

The screenshot displays the TUI website interface for hotel searches. The top navigation bar includes links like 'back', 'forward', 'main page', 'package', 'flights', 'accommodation', etc. The left sidebar contains filters for 'TUI Reisewelten', 'Hotelmarken / -konzepte', 'Hoteltategorie', 'Gesamtreisepreis', and 'Zielgruppe'. The main content area shows a list of hotel offers with columns for dates, hotel names, descriptions, and prices. Red boxes are used to highlight specific features: [1] highlights the '14 hits' and '14 available' counts; [2] highlights the 'TUI Reisewelten' filter section; [3] highlights a specific hotel entry 'Mykonian Kohili Korali Thalasso Spa'; and [4] highlights the 'calendar' button at the bottom.

[1] Este afisat raportul dintre rezultatele care indeplinesc caracteristicile si acele rezultate disponibile cu confirmare imediata. Ofertele disponibile cu confirmare imediata vor fi cele afisate pe pagina. Pentru a incarca toate aceste oferte disponibile, nu uitati sa accesati butonul **More (weitere)** – este activ si pana la epuizare ☺.

[2] In partea stanga a ecranului, avem posibilitatea de a rafina in continuare rezultatele obtinute, din categoriile existente.

[3] Ca de obicei, rezultatele sunt ordonate ascendent in functie de tarif. Atentie la perioada de calatorie si durata flexibila a sejurului, intrucat acestea pot varia, in functie de input-urile din pagina anterioara. Cu mouse over pe datele de calatorie putem verifica numarul de nopti inclus in oferta selectata.

[4] Din pagina de rezultate, avem posibilitatea de a accesa o functie complet noua prin intermediul butonului **calendar (Kalenderansicht)**. In acest display, pe fiecare dintre datele calendaristice cuprinse in intervalul solicitat, putem observa tariful total pe intreaga durata (cea mai mica indicata, in cazul in care si durata solicitata este flexibila). Perioada de calatorie pentru care rezulta cel mai mic tarif va fi automat evidentiata pe calendar.

Halbpension Plus & Vollpension Plus

Odata cu versiunea 10.0, avem doua noi tipuri de masa introduse in filtre, pe care le regasim in toate modulele eligibile, inclusiv in *Holiday matcher 2.0 (Urlaubsmatcher 2.0)*: **Halbpension Plus** si **Vollpension Plus**. Detalii concrete despre aceste tipuri de masa regasiti in descrierea fiecarui hotel care prezinta o astfel de cotaie din Product Info.
